

Front-End Web

Developer Skill

You have experience turning designs into browser-based interactive experiences, and communicating with server-side resources

Back-End Web

Developer Skill

You have experience architecting server-side systems, with a general knowledge of web services and session management

Front-End Desktop

Developer Skill

You have experience
turning designs into
desktop-based interactive
systems

Back-End Desktop

Developer Skill

You have experience architecting systems for desktop-based applications, and communicating with server-side resources

Front-End Mobile

Developer Skill

You have experience
turning designs into
mobile-based interactive
experiences

Back-End Mobile

Developer Skill

You have experience architecting systems for mobile-based applications, and communicating with server-side resources

Microservices

Developer Skill

You have experience
constructing and
connecting microservices

Reactive Services

Developer Skill

You have experience constructing reactive services, and understand "backpressure" and SSE

DevOps

Developer Skill

You have experience setting up and maintaining reproducible environments for development and production

Network Optimization

Developer Skill

You have experience with and understand various network protocols and how to optimize data for transmission over them

Server Administration

Developer Skill

You have experience installing and managing servers, server operating systems, and server applications

Database Administration

Developer Skill

You have experience
designing, implementing,
and managing databases

Test-Driven Development

Developer Skill

You have experience
writing automated tests for
evaluating correctness of
code

Documentation Generation

Developer Skill

You have experience
creating documentation,
both hand-crafted and
automated

Version Control Management

Developer Skill

You have experience
managing source code
version control systems
